Novel Preparation of Porous Alumina using Ice Particles as Pore-Forming Agents

By

Samantha G. Smith

Thesis submitted to the faculty of Virginia Polytechnic Institute and State University in partial fulfillment of the requirements for the degree of

Master of Science

in

Materials Science and Engineering

Gary Pickrell (chair)
Alex Aning
Carlos Suchicital

July 15, 2011
Blacksburg, Virginia

Keywords: porous ceramics, pore-forming agent, slip casting, ice

International Union of Pure Applied Chemistry

From IUPAC website http://www.iupac.org/publications/pac/

IUPAC makes freely available the full texts of all articles published in Pure and Applied Chemistry on the IUPAC Web site, for all except the current and most recently completed volumes. In addition, authors may immediately deposit copies of their own articles online, for archival and distribution purposes, but only in the form of the IUPAC published pdf version. IUPAC Technical Reports and Recommendations are freely accessible from date of publication.

Use of material such as figures and tables from articles published in Pure and Applied Chemistry is permitted so long as the source of the material is properly cited. If formal permission is required, please send a request to <pac@iupac.org>.
