Appendix B: IDA Plots
## Appendix B: Table of Contents

B.1 Peak Base Shear and Drift IDA 5-20% Crit Damp with Linear Dampers ....142  
B.2 Close ups of Peak Base Shear IDA 5-20% Crit Damp with Linear Dampers ....147  
B.3 Percent Reduction IDA 5-20% Crit Damp with Linear Dampers .................151  
B.4 Multi-Record IDA 10% Crit Damp with Various Types of Dampers .............156  
B.4.1 Multi-Record IDA for LA Ground Motions .......................................156  
B.4.2 Multi-Record IDA for NF Ground Motions .......................................158  
B.5 Multi-Record IDA 20% Crit Damp with Various Types of Dampers ..........160  
B.5.1 Multi-Record IDA for LA Ground Motions .......................................160  
B.5.2 Multi-Record IDA for NF Ground Motions .......................................162  
B.6 Multi-Record Standard Deviation IDA Curves .....................................164  
B.6.1 Standard Deviation IDA 10% Crit Damp .........................................164  
B.6.2 Standard Deviation IDA 20% Crit Damp .........................................165  
B.7 Peak Base Shear and Drift IDA Structure w/ Various Types of Dampers ....166  
B.7.1 IDA 10% Critical Damping ...............................................................166  
B.7.2 IDA 20% Critical Damping ...............................................................171  
B.8 Percent Reduction IDA Curves for Structure with Various Types of Dampers ....176  
B.8.1 Percent Reduction IDA 10% Crit Damp .............................................176  
B.8.2 Percent Reduction IDA 20% Crit Damp .............................................181  
B.9 Residual Displacement IDA 20% Crit Damp Structure .............................186  
B.10 Peak Base Shear and Drift IDA 20% Crit Damp with Yielding Braces .......190  
B.10.1 Dampers with $\alpha=0.5$ at 1% Drift .............................................190  
B.10.2 Dampers with $\alpha=1.0$ .................................................................192  
B.10.3 Dampers with $\alpha=1.5$ at 1% .......................................................194  
B.11 Residual Displacement IDA 20% Crit Damp Structure with Yielding Braces ....196  
B.11.1 Dampers with $\alpha=0.5$ at 1% Drift .............................................196  
B.11.2 Dampers with $\alpha=1.0$ .................................................................198  
B.11.3 Dampers with $\alpha=1.5$ at 1% Drift .............................................200  
B.12 Park and Ang Damage Index IDA Curves ..........................................202  
B.12.1 Multi-Record Damage Index IDA Curves .......................................202  
B.12.2 Damage Index IDA Structure with Various Types of Dampers ..........204  
Vita ...........................................................................................................206

Vita
(March 2003)
Michael G. Oesterle was born on January 20, 1979 in Hinsdale, Illinois. After completing high school in Villa Park, Illinois in June of 1997, Michael attended the University of Notre Dame where he graduated with a Bachelor of Science degree in Civil Engineering in May of 2001. In August of 2001 he arrived at Virginia Polytechnic Institute and State University to pursue a Master of Science degree in Civil Engineering. After graduating in the spring of 2003 Michael plans to marry Wainani Au on August 16, 2003 and begin studies for PhD in structural engineering at the University of California, San Diego for the following fall.
