Many thanks to my professors for support that challenged me and enabled me to grow rather than indoctrinating me.

Special thanks to:

Frank for continuous support from the first year and for always seeing noble and bigger issues,

Heiner who helped me translate my ideas into architecture in such way that they get enriched and refined,

B. Brown for wonderful theoretical base that helped me formulate and understand my position in architecture,

M. O'Brien for helping me make the first set of professional drawings,

My daughter Maryana, my son Milosh and my husband Dushan for showing patience, support and interest in my work and architecture.
