AN EMPIRICAL INVESTIGATION OF CORPORATE ENTREPRENEURSHIP INTENSITY WITHIN THE CASUAL DINING RESTAURANT SEGMENT

Michael G. Brizek

(ABSTRACT)

The purpose of this study was to identify the perception and relationships between corporate entrepreneurship (CE) practices and management performance. The use of Morris and Kuratko’s (2002) Corporate Entrepreneurship Assessment Instrument (CEAI) was used as the survey instrument for this study. A sample size of 1,200 unit managers, middle managers, and top management teams (TMTs) within nine casual dining restaurant organizations were surveyed with a response of 522 subjects at a rate of 44%. Responses of the CEAI results were studied using regression analysis and conclusions were drawn to support four out of the six hypothesis originally proposed in determining CE activity and management reinforcement. A post test analysis was also conducted in order to reinforce the previous results of the original study. This study concluded with the determination through an empirical analysis that forms of CE activity and enforcement are currently present within the casual dining restaurant segment.
Table of Contents:

Chapter 1. Introduction .................................................................1
1.1 Introduction ...........................................................................1
1.2 Research Terminology ..........................................................3
1.3 Problem Statement ...............................................................4
1.4 Research Purpose...................................................................7
1.5 Research Hypothesis .............................................................9
1.6 Context of the Study .............................................................9
1.7 Theoretical Underpinnings ...................................................10
1.8 Basic Model of CE ...............................................................14
1.9 Research Hypotheses ...........................................................16
1.10 Limitations ........................................................................20

Chapter 2. Literature Review .....................................................23
2.1 Introduction ........................................................................23
2.2 Entrepreneurship ..................................................................25
2.3 Corporate Entrepreneurship ...............................................33
2.4 Entrepreneurial Strategy ......................................................49
2.5 Entrepreneurship in Hospitality Research ...........................53
2.6 Summary and Conclusions ..................................................57

Chapter 3. Methods .................................................................69
3.1 Introduction ........................................................................69
3.2 Justification for Regression Analysis .....................................69
3.3 Unit of Analysis ..................................................................75
3.4 Data Collection Procedures .................................................76
3.5 Criterion Variables .............................................................76
3.6 Predictor Variables .............................................................76
3.7 Summary ...........................................................................79

Chapter 4. Results .................................................................87
4.1 Introduction ........................................................................87
4.2 Analysis .............................................................................87
4.3 Entrepreneurial Performance Index Results .......................88
4.4 Developmental Test ............................................................87
4.5 Entrepreneurial Index Test ...............................................88
4.6 Stepwise Regression Results of CEAI .................................89
4.7 Post Test Analysis of CEAI ...............................................91
4.8 Stepwise Regression Results of CEAI Post Test .................92
4.9 Survey Analysis ...............................................................94

Acknowledgments

I would like to acknowledge my committee for all of their advice and support for my research. I would also like to especially thank Dr. Mahmood Khan for his ongoing support and defense of my work during my last four years of doctoral work at Virginia Tech. Without Dr. Khan my pursuit of the degree would have not become a reality.

Finally I would like to dedicate this dissertation to my wife Lisa. Without her personal support and love, I would have not been able to accomplish this feat.
