GENDERED PROCESSES IN SELF-MANAGING TEAMS:
A MULTIPLE CASE STUDY

Anne Marjukka Ollilainen

(ABSTRACT)

This study examines how gender as a socio-cultural construction factors in the currently occurring change from a bureaucratic work organization to more interactive and team-based structures. Informed by Joan Acker’s theory of gendered organization, I identify processes that produce and reproduce gendered relationships of domination and subordination in self-managing teams, despite the premise that self-managing teams foster more egalitarian workplace relations. In a multiple case study, using in-depth interviews and participant observation, I examine four currently functioning, mixed-sex, self-managing teams in two service sector organizations and one manufacturing plant. The objective of the study is to uncover how and in what ways gender is present in teamwork and shapes various routine work processes.

The so-called “gendered processes” I found to occur in the four case-study teams include a gender division of team tasks that required women to perform clerical work even when teams were supposed to implement cross-functional task sharing. Gendered processes also took place through interaction and team metaphors of ‘family’ and ‘football team’. I illustrate how the construction of emotions in teamwork marginalized women’s contributions and how women and men consciously employed strategies to fit into expectations of gender-appropriate behavior. Despite these gender divisions, I suggest that one possible way for teams to improve organizational gender equality is that they emphasize non-hierarchical spatial arrangements. Finally, although I found gendered processes in all four teams, the ways in which gender shaped teamwork varied according to the organizational status position of a team. Also self-management proved the most comprehensive in teams that functioned at the higher organizational levels.

I thank the Finnish Work Environment Fund, The Foundation for Economic Education, and Ella and Georg Ehrnrooth’s Foundation, all of Helsinki, Finland, for their financial support towards the completion of this dissertation. This study was also supported by dissertation grants from Eemil Aaltonen’s Foundation of Tampere, Finland and Oskar Öflund’s Foundation of Espoo, Finland, for which I am grateful.
DEDICATION

I dedicate this dissertation to my father, Pekka Juhani Ollilainen, who has always encouraged and supported my intellectual curiosity and love of learning.

Omistan tämän väitöskirjan isälleni, Pekka Juhani Ollilaiselle, joka on aina rohkaisuttu uteliasuuttani ja tukenut rakkauttani oppia uusia asioita.
ACKNOWLEDGEMENTS

Through the years of my studies, I have learned that we seldom achieve our goals alone. I have benefitted from the professional and personal assistance of several people for whose dedication and support I am forever grateful. I thank my dissertation committee, Joyce Rothschild, Toni Calasanti, Ted Fuller, Rachel Parker-Gwin, Karen Hult, and Cornelia Flora for always having my best interest in mind. With the right combination of supervising, yet allowing independent thinking, they empowered me to develop my theoretical and practical understanding of the social world. I owe special thanks to my co-chair, Joyce Rothschild, whose intellectual fascination with egalitarian forms of organizing planted the seed for my interest in self-managing teams. My co-chair, Toni Calasanti’s research in gender and work inspired me to explore gender relations especially in the workplace. I also thank Toni for introducing me to the works of Joan Acker that revolutionized my perception of work organizations. Most importantly, both Joyce and Toni have shown me that a professor-student mentoring relationship can also develop into a friendship. I cannot think of a more valuable legacy to carry on, as I step into the shoes of an assistant professor. I owe my gratitude also to Matt McAllister in the Department of Communication Studies for always being available to answer my questions about the writing process and for guiding me through the nuts and bolts of the academic job search.

My dissertation group of Nancy McGehee, Sharon McGuire, and Meeta Mehrotra nurtured my mind as well as my body through the dissertation process. Thanks to these remarkable women, sociological debates will always be, in my mind, associated with mouth-watering Indian cooking. I am particularly indebted to Nancy for driving with me for 16 long hours to conduct interviews with one of my teams. I also thank Sharon McGuire, who explored with me the theory of gendered organizations in the initial stages of this study and also helped me interpret the interview data dealing with gender and emotions. Finally, I thank David Ferro, who, in the middle of Chapter 5, became my husband. Without David’s love and encouragement, writing this dissertation would have been a far more lonesome endeavor.
**TABLE OF CONTENTS**

Chapter 1.
Gender, Organizations, and Self-Managing Teams: Introduction to the Research Problem  
1.1. Introduction  
1.2. Research Questions  
1.3. Gender and Organizations  
  1.3.1. Gender as a Social Institution  
  1.3.2. Masculinities and Femininities: Gender as an Identity  
  1.3.3. Gender as a Relation  
  1.3.4. Gender as an Organizational Process  
1.4. The Self-Managing Team: Concept and Practice  
  1.4.1. Development of Teams in the U.S.  
  1.4.2. Efficiency of Teams  
  1.4.3. Employees in Teams  
1.5. The Gendering of Small Groups and Teams  
  1.5.1. Sex Differences in Group Behavior  
  1.5.2. Gendered Teams: An Application of ‘Useful Knowledge’  
1.6. Conclusion

Chapter 2.
Studying Gender and Teams: Site Selection, Methods, and Analysis  
2.1. Site Selection: “Desperately Seeking Teams”  
  2.1.1. Selection Bias  
2.2. Research Methods  
  2.2.1. A Multiple Case Study Design  
  2.2.2. Choosing a Method  
  2.2.3. Data Collection  
    2.2.3.1. Data collection as data analysis: intersection of gender and race  
2.3. Analyzing Gender: How Do We Know Something Is “Gendered”?  
  2.3.1. A Few Words on Positionality and Meaning Creation  
  2.3.2. Developing the Theory of Gendered Organization  
2.4. Verification and Limitations  
2.5. Conclusion

Chapter 3.
Self-Management in Service Teams: Banking, Insurance, and Manufacturing  
3.1. Introduction  
3.2. Bank Services: Two Approaches to Self-Managing Teams at Eastern Alliance  
  3.2.1. Special Projects Team: History and Composition  
  3.2.2. Team Tasks and Organizational Position  
  3.2.3. Employee Credit Team: History and Composition  
  3.2.4. Team Tasks and Organizational Position  
  3.2.5. Self-Management in Eastern Alliance Teams
