# TABLE OF CONTENTS

**CHAPTER 1: Deregulation of Electricity Markets Around the World**

- Introduction ............................................. 2
- Background ............................................. 2
- Purpose of Research .................................. 3
- Research Methodology ................................. 4
- Scope and Limitations ................................ 5
- Plan of Presentation .................................... 5

**CHAPTER 2: Designing Electrical Power Districts in the Republic of Ghana**

- Introduction ............................................. 8
- Districting Problems ................................... 8
- The Electrical Power Districting Problem ........ 10
- A General Mathematical Framework ............... 11
- Solving the Districting Problem ...................... 14
  - Simulated Annealing .................................. 14
  - Evolutionary Algorithms .......................... 17
  - The Genetic Algorithm .............................. 17
- Creating Power Districts in the Republic of Ghana 19
- Empirical Study – Single Criteria ................. 22
  - Parameter Settings .................................. 24
  - Dynamic Analysis .................................... 24
    - Revenue Deviation ................................ 25
    - Compactness ....................................... 27
- Static Analysis ......................................... 30
  - Revenue Deviation .................................. 31
  - Compactness ......................................... 32
- Summary .................................................. 33

**CHAPTER 3: The Multi-Criteria Electrical Power Districting Problem**

- Introduction ............................................. 35
- Multi-Criteria Decision Making Concepts ........ 35
- The Multi-Criteria Electrical Power Districting Model 36
- Evolutionary Algorithms and MCDM .............. 38
  - Pareto Ranking ..................................... 39
- A Hybrid Algorithm for the Multi-Criteria EPDP 39
  - Simulated Annealing Genetic Algorithm ....... 40
  - Parallel Simulated Annealing ..................... 42
- Empirical Study with Multiple Criteria – Part I 42
  - Non-dominated Solution Set ...................... 43
APPENDIX A: Simulated Annealing Procedure for the EPDP

Simulated Annealing Operators
  The Swap Operator
  The Split Operator
Simulated Annealing Pseudo-Code for the EPDP

APPENDIX B: Evolutionary Model for the EPDP

Genetic Algorithm Operators
  GA Design Concepts
Toward a DNA Based Evolutionary Model
  Major DNA Components
  A DNA Based Evolutionary Model
  The Classical Genetic Algorithm Model
  Enforcing Connectivity with DNA Bonds
  DNA Object Model
  Encoding DNA
  The Crossover Operator
  Crossover Operator Pseudo-Code for the EPDP
  The Mutation Operator
  Mutation Operator Pseudo-Code for the EPDP

APPENDIX C: Random Problems – Equivalence Class Layer 1 – SAGA/PSA/Random

APPENDIX D: Random Problems – Graphical Solutions – SAGA/PSA/Random

APPENDIX E: Report on False Dominants

CURRICULUM VITA
