Top of the World Estates

Environment

Waste

- Utilize on-site biological waste treatment when possible
- Minimize waste; recycle and reuse
- Recycling is encouraged, on-site collection is available for community residents.
- Waste is discouraged; composting is demonstrated and encouraged by the Farm.
- A biological waste treatment facility is used to treat much of the community’s waste. The remainder of the community’s waste treatment is land based.

Air

- Utilize vegetation to capture pollution particles to improve air quality
- New plant material that is installed must be known to reduce airborne pollutants
- Promote public transportation & pedestrian travel to reduce pollution emissions
- Pedestrian travel is encouraged within the community via walking and bicycling paths
- Public uses should be setback outside of the Zone of Significant Contamination
- Not Applicable
