Acknowledgements

First of all, I would like to express my sincere gratitude and deep appreciation to my advisor, Dr. Anbo Wang for his continuous guidance, inspiration and enthusiasm. He manages to strike the perfect balance between providing direction and encouraging independence. Throughout my thesis-writing period, he provided encouragement, sound advice, good teaching, and lots of good ideas.

I am grateful to my colleagues in the Center for Photonic Technology (CPT) who have assisted me in the course of this work. Among them, Gary, Bill and Rajiib, Wei Peng, Kristie and Debbie have been particularly helpful and generous with their time and expertise.

I am indebted to my many student colleagues for providing an environment in which to learn and grow. I am especially grateful to Bing Yu, who taught me how to start with photolithography, Yizheng Zhu, who led me to fabricate the first sensor, Fabin Shen, who gave me many advices on sensor fabrication and sensor testing.

Lastly, and most importantly, I would like to thank my parents, who have always encouraged me and guided me to independence. I am grateful to them and amazed at their generosity.
