Deformations of Unsymmetric Composite Panels

Tomoya Thomas Ochinero

Dissertation submitted to the Faculty of the Virginia Polytechnic Institute and State University in partial fulfillment of the requirements for the degree of

Doctor of Philosophy
in
Engineering Mechanics

Michael W. Hyer, Chair
Alfred C. Loos
Don H. Morris
Liviu Librescu
Yuriko Renardy

October 24, 2001
Blacksburg, Virginia

Keywords: composite materials, plates, shells, Rayleigh-Ritz technique, buckling, postbuckling, warpage, graphite, carbon, residual stress, geometrically nonlinear effects, imperfections
