Holonomic Elastoplastic Truss Design
Using Displacement Based Optimization

By
Wenjiong Gu

Thesis submitted to the Faculty of the
Virginia Polytechnic Institute and State University
In partial fulfillment of the requirements for the degree of

Master of Science

In
Aerospace Engineering

Approved
Zafer Gürdal, Chairman
Rakesh K. Kapania
Liviu Lebrescu

October, 2000
Blacksburg Virginia

Keywords: Displacement based optimization, Structural optimization, Truss design, Material nonlinearity, Holonomic elastoplasticity, Linear Programming
