Our Dreams
and Vision for this Revolution

The Roadblocks
or Problems to Consider

- Learning to collaborate is slow.
- Maintaining the purity of Reggio.
- How to get small enough classes.
- Collaboration does not seem to be the daily schedule.
- Article writing to parents.
- Keeping this revolution a priority.
- Sharing Leadership.
- That some people may see it as a fad.
- The word "Revolution".
- A school within a school will help.
- It will be considered. Enter "/p"
- What about Special Ed.?
- Can we risk more criticism?
- Making certain that everyone feels
- Fearful of a bad experience with it.
- That I care about.
- Writing the position paper.
- TIME
- We need to find funding.
- Finding a way for a fairly large population.
- SOL tests.
- Getting buy-in on the concept.
- Short learning schedules, short the kids.
- Resistance to change.

My dream was to think
Collaboration, CO would
never happen again. It
would be about collaboration
and about accepting people
and knowing differences.

We all learn to really collaborate
and just cooperate.

On a Sunday afternoon, it
would be fun to come
and paint, change and it
would never seem like
school.

The leader, and kids couldn't
want to get to school.

We need to plan activities, planning activities that
are like a Community.

Need to connect socially, a need to see yourself.
