DESTINATION ATTRACTIVENESS AS A FUNCTION OF SUPPLY AND DEMAND INTERACTION

by
Sandro Formica

Dissertation submitted to the Faculty of the Virginia Polytechnic Institute and State University in partial fulfillment of the requirements for the degree of

DOCTOR OF PHILOSOPHY

In

Hospitality and Tourism Management

APPROVED:

Dr. Muzaffer Uysal,
Chairman

Dr. Ken McCleary

Dr. Suzanne Murmann

Dr. James Littlefield

Dr. Joseph Sirgy

November 2000

Blacksburg, Virginia

Keywords: Destination Attractiveness, Measurement, Regional Analysis, Tourist Attraction
The driving force of the tourism industry is represented by the attractions at destination. Travelers have no reason to visit destinations that have nothing to offer. Tourism research has demonstrated that attraction studies are necessary in the understanding of the elements that encourage people to travel. Achieving the goal of measuring destination attractiveness requires the understanding of its components and their relationships. There are two ways of examining attractiveness: by studying the attractions or by exploring the attractiveness perceptions of those who are attracted by them. As competition among tourism destinations increases and tourist funding decreases, it is of vital importance to understand how the inventory of existing attractions at destination relates to the perceptions that travelers have of those attractions.

Tourism literature provides only a limited number of studies addressing destination attractiveness. Those studies focus exclusively on the measurement aspect of attractiveness and ignore the analysis of its components. The purpose of this study was to generate a new measurement tool for destination attractiveness and to examine the relationship between its elements. The principles of regional analysis, tourism planning, and tourism attraction research provided the foundation for a measurement and hypothesis testing model. This model is based on the assumption that tourism is a system, which is a function of supply and demand interaction.

Four attraction dimensions—tourism services and facilities, cultural/historical, rural lodging, and outdoor recreation—were found to represent the attractiveness portfolio of the destination. According to the findings, no correlations were found between demand and supply importance of the four dimensions. Among demand representatives, market segments perceive and value attractions in different ways. The study explored the attractiveness evaluation of eight tourist regions and discovered correlations between demand and supply indicators. Additionally, it was established that the overall regional measures of demand and supply destination attractiveness explain the economic benefits of tourism in the same region.
Among the contributions of this study is the development of a model that allows the simultaneous empirical assessment of demand and supply indicators of destination attractiveness. The findings of this study provided important implications for the development of robust tourism plans, promotional strategies, and resource allocation policies.
Dedicated to my mother, Maria Teresa, and my father, Luciano

Happiness can be achieved through training the mind.

- Dalai Lama
ACKNOWLEDGEMENTS

Completing a dissertation requires extraordinary persistence, determination, and commitment. Such a project is not the result of an individual endeavor and many individuals contributed to this work. Each of them has my sincere gratitude and appreciation.

I would like to thank my advisory committee members, Muzaffer Uysal, Ken McCleary, Suzanne Murrmann, James Littlefield, and Joseph Sirgy for the time and energy spent on my work. Because of their unique knowledge and skills, they have provided me with a number of opportunities to learn and grow, both professionally and personally. Despite the great effort that is involved in carrying out a dissertation, I have fully enjoyed the process because of the inspiration, encouragement, and challenge set fourth by the committee members.

Throughout my graduate studies Committee Chairman Dr. Uysal has been my mentor and academic guide. I will never be able to fully express how grateful I am to him for sharing with me his knowledge, wisdom, research skills, and intellectual input. He has always been available, especially during times of greatest need. His unique way of encouraging me with research opportunities and praise has benefited me greatly and has guided me in my dissertation journey.

Dr. Murrmann’s exceptional knowledge in theory construction helped me to see research from a different angle. Our theoretical discussions have played a critical role in stretching my personal boundaries in conceptual and analytical thinking. Her energy in communicating concepts and ideas has sponsored my interest in research.

Dr. McCleary’s input has always been enlightening and valued. His academic diligence and intellectual brilliance have provided direction and feedback for many aspects of my dissertation. His faith in my academic and professional competence has greatly influenced my self-esteem.

I wish to thank Dr. Littlefield for his help and assistance in my academic endeavors. His gentle and soothing nature has provided a foundation for my academic work. His mission in helping others is an excellent example for me to follow and will be always remembered.

Sincere gratitude is expressed to Dr. Sirgy for taking the time, whenever necessary, to provide suggestions that have significantly improved the quality of this dissertation. His expansive knowledge and firm commitment to supporting this work have set high standards, which allowed me to explore and discover on my own. He taught me how to reach for the best and seek excellence in every occasion.

I am grateful to my mother Maria Teresa, for having always emotionally supported my academic endeavors. I wish to thank my father, Luciano, who showed me his love and passion for education.
Last, but not least, I would like to thank Audrey for her unconditional help, support, and encouragement throughout the dissertation process. I express my appreciation for the many sacrifices that she has made. She has always believed in me and sustained me through the most difficult times.
