Exploring the Academic and Social Transition Experiences of Ethnic Minority Graduate Students

Miya T. Simpson

ABSTRACT

Despite gains made in the educational attainment of ethnic minorities, members of these groups remain underrepresented in higher education. Fewer numbers of minorities at the undergraduate level translates into fewer minority students eligible to pursue graduate and professional degrees. As such, institutions of higher education have begun to recognize the importance of not only ensuring that minority students earn bachelor’s degrees, but that they are prepared for success in graduate school. Graduate school preparation programs (GSPPs) were created to improve access, retention, and graduation rates among groups underrepresented in higher education, and prepare them for transition to graduate study. To date, however little research has been conducted to see if GSPPs actually assist minority students in making that transition.

This study explored the academic and social transition experiences of minority students to graduate school and analyzed the differences in transition by race (Black/African American, Hispanic/Latino, American Indian/Alaskan Native), type of GSPP experience (no program, research-only program, graduate/professional school seminars only, holistic program), and duration of experience (less than six weeks during summer, 7-12 weeks during summer, summer and academic year). The study employed a national sample of 621 ethnic minority graduate students at nine research extensive universities. Data were collected using the Minority Graduate Student Experiences Survey (MGSES), a 77-item instrument specifically designed for this study. Items for the survey were developed utilizing existing literature on the academic and social integration experiences of graduate students.

Overall, ethnic minority graduate students reported favorable academic and social experiences but appear to be more satisfied with their academic experiences than their social experiences. No significant differences were found by race on any of the subscales on the Academic Experiences (AE) scale, however, differences did emerge between Black/African American graduate students and Hispanic/Latino graduate students on one subscale of the Social Experiences (SE) scale. Significant differences were also found by
program type and program duration on the AE and SE subscales. Finally, results indicated differences between those who reported no program involvement and those who had been involved in a program of some type on the both the AE and SE scales.
Acknowledgements

Whew! What an arduous, but rewarding journey this has been. Reflecting on my life to this point, I am filled with tremendous emotion and gratitude. And as my dream of attaining my Ph.D. becomes a reality I am reminded once again of the depth of God’s grace and mercy. Thank you for giving me life and for enriching it with great family, friends, and opportunities. “To God be the glory!”

To my wonderful parents, You are truly my heart, soul, and joy and I thank God everyday for blessing me with you. You have supported me, encouraged me, believed in me, disciplined me, and loved me unconditionally. You taught me to aim high, work hard, and have faith. Boy, am I glad I was “left on that doorstep.” I Love You!

To all of my family and friends, Thanks for traveling this road with me and for helping me to find the strength and courage to carry on when things got tough. I will cherish you always! Tricia, thanks for planting the seed by making me a part of your college experience when I was only 6 years old. Anita, Marjorie, and Melanie – you have stuck with me through thick and thin and believed in me when I doubted myself. Your friendship is priceless! Andre, Andrea, Ellen, Eric, Selwyn, Roxie, and Tim – thanks for making this (and Blacksburg) more bearable and for giving me a family away from home. Blanche, we started on this journey together but God had other plans for you – please continue to smile down on me.

To Joan Hirt, You are such an inspiration! I am grateful for your guidance, advice, compassion, diligence, insight, and professionalism. You epitomize what an advisor and mentor should be and though it was not always evident, I appreciate all that you have done for me. Thank you for not settling for anything less than you knew I was capable of giving.

To my colleagues within and outside of CAEE, Thanks for giving me the time, space, and nudging I needed to get this done. You were always there to help me when I needed it. Karen, Delores, and Pat – thank you for your great leadership and genuine interest in my success.

To my committee members, Your time and advice are greatly appreciated. Thank
you for having confidence in me and for being there whenever I needed you. And thanks to all who participated in this study, for without you I would not be at this point.

To my HESA cohort members, You are a special group and I’m glad we were chosen to share this experience together. Thanks for contributing to a positive and supportive academic environment. I respect and appreciate each of you. Kim and Emet, thank you for being there with and for me from the first day we met. Denise, thank you for your time and willingness to help whenever I needed it – this could have been a lot harder without you.

To my “babies” in the Virginia Tech McNair Scholars Program (current and alumni), Your commitment, energy, drive, and enthusiasm renew my spirit daily and inspire me to be the best person and role model I can be. Thank you for motivating me and for letting me be a part of all that you will achieve.

And finally, thank you Miya for not giving up or giving in (though there were many times when I wanted to). This is truly a major milestone in my life but the journey continues, for:

“One’s work may be finished one day, but one’s education never.” Alexandre Dumas, pere

Love, Peace, and Blessings to All!
