Figure 48. Northern analysis of the DdRPA1 mRNA. Lane 1: RNA ladder standard; lane 2: 5 micrograms of total RNA from undifferentiated cells; lane 3: 10 micrograms of total RNA from undifferentiated cells; lane 4: 5 micrograms of total RNA from differentiated cells; lane 5: 10 micrograms of total RNA from differentiated cells. *clr1* (sense) <--> *clr2* (antisense) PCR fragment was the probe.
