Adult Learning in the Workplace:
A Conceptualization and Model of the Corporate University

Karen L. Barley

(Abstract)

By exploring the historical development and current state of the corporate university through literature reviews, case study analyses, and interviews with corporate university practitioners, this study conceptualizes the corporate university. The shortage of knowledgeable workers in technical areas and rapid advances in technology have energized adult learning in the United States. In response to these changes and needs, many corporations have incorporated formal learning programs into their organizations. As conceptualized in this study, the corporate university is Corporate America’s vehicle for providing learning programs to their workers with the goal of developing and maintaining a highly skilled, knowledgeable, and adaptable workforce that contributes to organizational performance.

Through an historical development and conceptualization based on interviews with corporate university practitioners and case study analyses, this study also examines the strengths and weaknesses of the corporate university. The corporate university does, in fact, provide a useful and innovative way to reach a portion of the adult learning population. Moreover, the corporate university provides learning initiatives that are related to the adult’s current and future role in the workplace. In this way, the learning opportunities provided by the corporate university make the knowledge relevant and accessible to the adult learner. However, the corporate university is not founded on adult learning principles and is chartered to consider corporate success rather than individual development. This purpose endangers the corporate university in that it has the potential to exploit the American workforce by forcing undesired learning opportunities.

This study identifies a basic component, partnership, that helps many corporate universities avoid employee exploitation and provide learning opportunities that have meaning to both the individual learners and the organization. The partnership component is foregrounded in a model for program development that is presented in this construct for future and current corporate university planners. The model is not tested in this thesis; however, it has been reviewed and endorsed by a panel of corporate university experts. Provided that partnership is considered and integrated into the approach, this study concludes that the corporate university, as a conceptual and an interactive model, is a useful vehicle for reaching the adult learner and for preparing and maintaining an American workforce able to manage change and remain competitive.
Acknowledgements

Reflecting on the process of researching and writing this thesis, I recall the support and advice that so many advisors, colleagues, family, and friends have provided. My committee, Dr. Marcie Boucouvalas, Dr. Albert Wiswell, and Dr. John Wells, has provided invaluable guidance and direction which focused my research and enriched the end result. For their commitment, I thank them. Their guidance was matched by another set of readers. Pinpointing gaps and identifying loose ends, Dr. Louise Rainis, Dr. Peter Murk, and Ms. Lynn Densford graciously offered insights into the model as it unfolded. I appreciate their critical eyes. John and Louise deserve the greatest thanks as they endured the process almost on a daily basis. May our future business endeavors by equally fulfilling and rewarding for all of us.

My family and friends were the greatest source of strength in completing this thesis in the midst of conflicting priorities and loyalties. Thanks, T, because you always listened even when I did not. To my classmates, Denise, Berri, Gary, Jason, Beth, Tammy, and Janet, who consistently showed great interest in my work and wondered what possessed me to choose the thesis option (its not madness but drive), thanks for remembering my topic and supporting me. To my family and friends, thanks for keeping the faith. Finally, guy, you’re the best.
### Table of Contents

**Preface**  
Introduction  
Purpose  
Methodology  

**Chapter 1: A History of the Corporate University**  

**Chapter 2: A Conceptualization of the Corporate University**  
Purpose  
Components of the Corporate University  
Strategically Aligned  
Integrated Curriculum  
Proactive Approach  
Partnership  
Long Term  
Management  
Individual and Organizational Learning Theories  

**Chapter 3: A Corporate University Model**  
Partnership  
Organizational Assessment  
Strategic Alignment  
Curriculum Development  
Program Implementation  
Evaluation  
Discussion  

**Chapter 4: The Future of the Corporate University**  
Benefits  
Complexities  
Recommendations  
Field Test  
Research  
Consortium  
Evaluation  
Accreditation
