List of Figures

Fig. 2.1 Schematic of an EFPI-based sensor 7
Fig. 2.2 Detected intensity as a function of air-gap length 8
Fig. 2.3 Signal fading in fiber interferometers 9
Fig. 2.4 Sensor arrangement in a QPS EFPI sensor scheme 10
Fig. 2.5 Signal output in a QPS EFPI sensor scheme 11
Fig. 3.1 Schematic of single-axis, passively temperature compensated sensor 15
Fig. 3.2 Overall system arrangement for a single axis system 15
Fig. 3.3 Optical sub-system using a single laser diode 18
Fig. 3.4 Block diagram of laser diode assembly 19
Fig. 3.5 Electronic components of the system 20
Fig. 4.1 Components of the electronic signal processing system 21
Fig. 4.2 Schematic of a single-channel preamplifier circuit 22
Fig. 4.3 Equivalent photodiode model with dc error sources 23
Fig. 4.4 Block diagram of QPS signal demodulation scheme 25
Fig. 4.5a Analog implementation of QPS signal demodulation scheme 26
Fig. 4.5b Circuit schematic of the demodulation system 27
Fig. 4.6 Schematic of microprocessor-based signal demodulation system 28
Fig. 5.1 Schematic of a single axis sensor assembly 31
Fig. 5.2 Experimental setup 32
Fig. 5.3 Initial operating point of the sensor 33
Fig. 5.4 Magnetostrictive response of metglas material 35
Fig. 5.5a Low field response of sensor 3 (X-axis) 36
Fig. 5.5b High field response of sensor 3 (X-axis) 36
Fig. 5.6 Field response of sensor 2 (X-axis) 37
Fig. 5.7a Low field response of sensor 4 (Y-axis) 38
Fig. 5.7b High field response of sensor 4 (Y-axis) 38
Fig. 5.8 Field response of sensor 5 (Y-axis) 39
Fig. 5.9a Low field response of sensor 6 (Z-axis) 40
Fig. 5.9b High field response of sensor 6 (Z-axis) 40
Fig. 5.10a Low field response of sensor 7 (Z-axis) 41
Fig. 5.10b High field response of sensor 7 (Z-axis) 41
Fig. 5.11 Calibration curve for X-axis 42
Fig. 5.12 Calibration curve for Y-axis 43
Fig. 5.13 Calibration curve for Z-axis 43
Fig. 5.14 Experimental arrangement of magnetometer system 44
Fig. 5.15 Electronic signal processing system box 44
Fig. 5.16 Calibration setup 45
Fig. 5.17 Complete experimental setup 45
